Save time. Save money. Save the Planet.

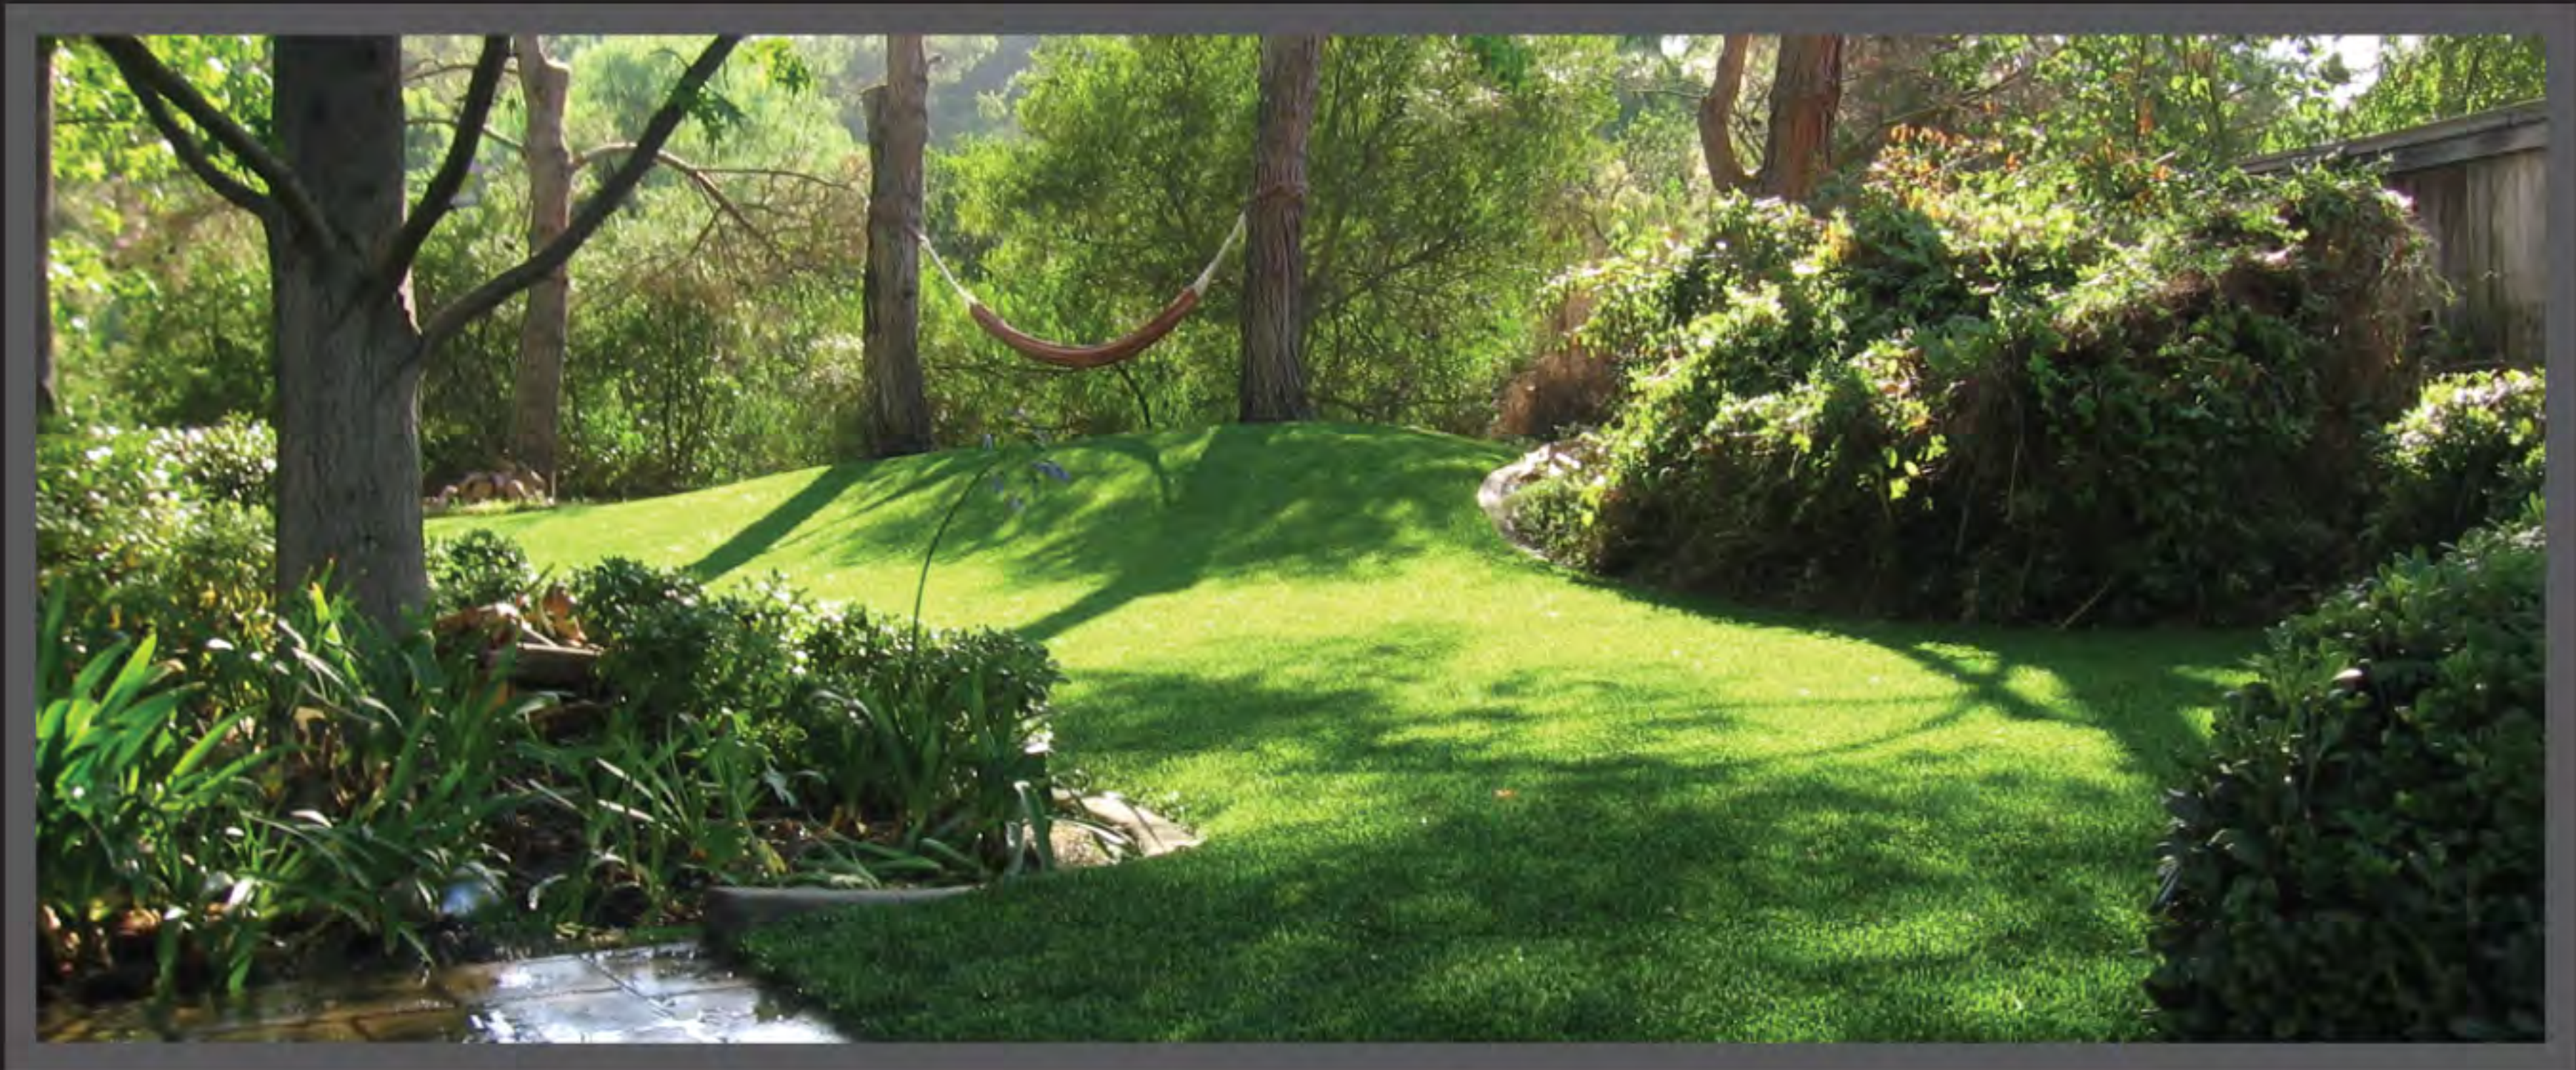

Landscapes designed to save you time and money

Eliminating a major expense, such as maintaining and watering a lawn, is a unique opportunity that literally pays for itself. Rising costs of watering your lawn and fueling lawn maintenance equipment make it difficult to keep your lawn looking its best. Now is the perfect time to take advantage of all the benefits SYNLawn® has to offer. With the SYNLawn® Landscape System you will save money on your maintenance costs and you may even get money back from your local water authority. All this while providing a beautiful, earth-friendly landscape solution to help you do your part for the environment.

A perfect green lawn that pays for itself

The SYNLawn® Landscape System is designed to help you control the costs associated with maintaining your lawn. It gives you the perfect green lawn you’ve always wanted and puts a little more green back in your wallet.

On average, the typical household in America uses over two-thirds of their monthly water consumption on lawn irrigation. Water conservation has become such a major concern that more and more city water authorities are offering rebates encouraging the use of SYNLawn®.

Simply the best brand of synthetic grass anywhere

The first name in landscape

Artificial grass is widely known for its use on sports fields, however, SYNlawn® products were built exclusively for landscapes. In fact, SYNlawn is a pioneering innovator of synthetic landscape grass, a product category that started a revolution in WaterSmart landscaping. Today we have the largest selection of synthetic landscape grasses in the industry.

Manufacturer backed

SYNlawn® manufactures, distributes, installs and warrants all of the products we sell. Utilizing state-of-the-art research and development combined with superior quality control over each aspect of the production process, SYNlawn's artificial grass offers unrivaled craftsmanship, durability and precision installation methods backed by a long-lasting manufacturer warranty and life expectancy.

LANDSCAPE

The SYNLawn® solution

SYNLawn landscape designs go beyond artificial grass by considering the entire picture while creating a lush livable green space for you to enjoy. Our meticulous attention to details during installation complete the natural appearance with perfect transitions between SYNLawn and your flower beds, shrubs, hedges, walkways and/or paving stones.

Unlimited design possibilities

SYNLawn is first in realistic appearance and unparalleled performance for synthetic lawn grass. But it doesn't end there. SYNLawn can go in places never before possible with ordinary grasses. Places like rooftops, decks, patios, over concrete or even indoors. The possibilities are endless.

WaterSmart landscaping

Our professional installation package includes more services other than installing your new grass. These services include proper ground or grading preparation, proper drainage flow, and proper irrigation to trees, shrubs and other live plants in your landscape.

Green all over

SYNLawn® is green on top, in the middle and even underneath. Beyond the color, SYNLawn goes a long way toward environmental sustainability, taking measurable steps to be truly "green". Made in the USA, our biobased products are 100% recyclable, using renewable and recycled materials during the manufacturing process. Using SYNLawn can reduce your carbon footprint by conserving water, eliminating emissions from lawn equipment, and lowering the impact on landfills due to its long life expectancy.

SYNLawn's exclusive EnviroLoc™ Backing System has an enhanced multi-layer component system that "locks" in durable turf fibers, extending the product's life cycle. Engineered using BioCel™ technology, the EnviroLoc™ Backing System replaces a large portion of petroleum-based polymers with bio-based polymers created from soybean plants (a rapidly renewable resource), then adds Celceram™ (a recycled product of coal combustion) for superior strength and dimensional stability. Together these biobased technologies provide an environmentally responsible approach to artificial grass that conserves Earth's natural resources and will look great for years to come.

For environmentally conscious builders and specifiers, SYNLawn offers water efficient landscaping products using recycled content, renewable materials and innovative design which can contribute points to LEED® (Leadership in Energy and Environmental Design) project certification.

Earth Friendly

- + 100% recyclable content
- + Reduces fuel consumption
- + Reduces carbon emissions

Water Friendly

- + Saves millions of gallons
- + Drains like natural grass
- + Reduces maintenance costs

Pet Friendly

- + Safe for pets of all sizes
- + Pets stay clean & healthy
- + Controls rodents & pests
